

# Book a Cook

## The Problem

Home cooks face a fragmented recipe management experience.

Recipes come from everywhere:

physical cookbooks, TikTok videos, magazine clippings, and family handwritten notes

Yet there is no unified solution to organize, search, and cook from all of them.

### Key pain points include:

- Cookbooks are bulky and difficult to search. Finding a recipe based on available ingredients is nearly impossible.
- TikTok cooking videos disappear in endless feeds. Users screenshot or save videos but never cook from them.
- Magazine and handwritten recipes get clipped and lost. No easy way to digitize and organize them.
- Grocery shopping is inefficient. Users don't know what ingredients they already have or what they need to buy.

## Target Audience

### Primary: Gen Z & Millennial Home Cooks (18-35)

- Discover recipes primarily through TikTok
- Own 1-5 cookbooks but rarely use them due to inconvenience
- Value speed and convenience: want recipes extracted in seconds, not minutes

### Secondary: Cookbook Collectors & Enthusiasts (25-55)

- Own 10+ cookbooks and want to digitize their collection
- Want to search across all their cookbooks by ingredient or cuisine
- Willing to pay for a comprehensive kitchen management solution

## Influencer Alignment: Eitan Bernath

This app is designed for Eitan Bernath's audience: young food enthusiasts who engage with cooking content on social media and want to actually cook the recipes they discover.

Eitan's 3M+ TikTok followers represent the exact demographic that struggles with recipe fragmentation.

## Monetization Strategy

### Freemium Model with Subscription Tiers

We use a generous free tier to drive adoption, with clear upgrade triggers when users hit limits. RevenueCat powers all subscription management.

#### Free Tier (Acquisition & Engagement):

- 1 cookbook stored
- 3 TikTok/magazine recipes imported
- 3 kitchen ingredient scans
- 10 AI recipe generations

#### Pro Tier (Monetization):

- \$1.99/month or \$19.99/year (17% savings)
- Unlimited cookbooks, recipes, scans, and AI generations
- Priority support

#### Conversion Strategy:

- Soft paywall: Users experience full functionality before hitting limits
- Contextual upgrade prompts when users attempt actions beyond free limits

## Competitive Advantage

- **Massive database:** 1,400+ cookbooks and 1M+ recipes. **Scalable to 500K+ cookbooks**
- **Speed:** 8-second TikTok recipe extraction (competitors take 20+ seconds)
- **All-in-one:** No other app combines cookbook scanning, video extraction, magazine OCR, and kitchen inventory
- **No copyright issues:** Our database structure avoids reproducing copyrighted content
